**Joint Press Release by
OEAMTC Air Rescue and Reiser Simulation and Training GmbH
OEAMTC Air Rescue and Reiser Simulation and Training sign LOI for the Provision of
an Avionic Desktop Trainer with Simulated Helionix® Software Suite**

London, UK, Helitech 2017 Show, 5th October 2017

In anticipation of future flight operation challenges of the Austrian Air Rescue System, OEAMTC Air Rescue focuses on pilots and technical crew members training. To not only ensure but even improve highest quality standards of flight safety, Cpt. Reinhard Kraxner and Marco Trefanitz, Managing Directors at OEAMTC signed a LOI for the provision of REISER's avionic desktop trainer for the simulated Helionix® software suite at Helitech 2017 in London.

About OEAMTC Air Rescue:

OEAMTC Air Rescue operates a nationwide network of 16 emergency rescue helicopter bases. It all started in 1983 with the beginning of operation of Christophorus 1 in Innsbruck and Christophorus 2 in Krems – Austria's first emergency rescue helicopters. This was also the kick-off of the rapid development of a nationwide emergency doctor system in Austria - on ground as well as in the air. Regarding emergency medical aid Austria meanwhile is one of the most modern and best provided countries worldwide. The OEAMTC-Air Rescue also operates its own maintenance company, HeliAir and its own training division, the AirRescueCollege.

About Reiser Simulation and Training GmbH:

Reiser Simulation and Training GmbH (RST) can look back on almost 30 years of experience in the fields of simulation and training technologies for military and civil aviation platforms. The family-owned company

with headquarters south of Munich presently employs more than 200 aviation experts at two premises. RST's range of products and services primarily covers the development, design and production of simulators and training media for both pilots and maintenance personnel. The company's reputation has been built on understanding its client's needs, applying extraordinary quality standards and manufacturing the most reliable products of its class which reduce the operational cost for its customers.
