

WE ACQUIRE THE DATA AND DEVELOP YOUR FLIGHT DYNAMIC MODEL.

- Data acquisition for simulators up to FFS Level D (EASA, FAA, ICAO).
- Most lightweight flight data acquisition system in the market.
- Modular distributed sensors for time synchronized recording of displacement, vibration, position, acceleration, video and audio.
- Avionic bus interfaces for various types including ASCB-D.
- Real time data analysis during flight.
- From data collection to certified models...

OUR FLIGHT TEST ENGINEERS AND MODELLERS MAKE IT HAPPEN.
